

# BOX ONE4ALL

## THE PROBLEM

Blind and visually-impaired people lack an integral technology to improve their accessibility, safety, and overall quality of life.

There are near 50M blind and visually-impaired people in the USA and Europe alone, among them, almost 20M live also with several medical pathologies, consequently their entire multi-sense perception is strongly deprived, affecting their ability to work and develop personal relationships.

## THE SOLUTION

Integration, Multi-functionality & Design to provide a differential solution for blindness, sight loss and Health.

One4all is a robust mobile assistive technology device, aimed at increasing the quality of life of visually-impaired people and people with poli-pathologies, via improved autonomy and safety. It strives to boost both interaction with the surroundings, body health parameters as well as accessibility through self-customizable and integrated multiple functionalities.

## THE PRODUCT

The Box Onne4All is a small device equipped with inter-changeable sensors that retrieve and analyze information from the user & the surroundings, and share it with the user through their own smartphone.

It's competitive price, compact design, self-customization, full compatibility across platforms, and capacity to integrate existing and new functionalities into a single product, make of it an absolute must-have.

### MILESTONES

**Founded**  
2015

**SME Instruments**  
2016: 1,079,979 €

**First Investment round**  
Sept 2018: 0,4M€
